It is located in pure nature surrounded by forests, lakes and rivers and is 150 km away from the arctic circle. It is newly build every year and you might be enchanted by its beautiful cold surrounding with its ice sculptures and mythical creatures. After a few drinks which are served in glasses made out of ice you will sleep in a beautifully decorated suite. The beds are also made out of ice but you will get a cozy sleeping bag in which you might dream about the adventures you experienced during the day. You may also rent a snowmobile and drive with it over the frozen lakes and rivers. But the highlights are the Northern lights which you can see when the weather is nice. But the North is also known for its good food. Deer carpaccio, reindeer steak and delicious salmon are only few of the culinary dishes Sweden has to offer. You can combine the journey with a few days in beautiful Stockholm where you can visit the old town and the king's palace.
